PROTEO

Professional Developer

Salary: £30-40k on experience per annum + flexible hours and 5% pension contribution

Role

Proteo seeks a motivated and experienced developer looking to increase their experience in a fast moving company involved in the creation and provision of exciting technology products, solutions and services.

Reporting to a Solutions Architect, the candidate will be responsible for working alone or as part of a team on client or internal product development projects to build, test and performance tune software applications across web and mobile platforms.

You will need to be a competent all-rounder (front end, middle and backend development) able to work with a Solution Architect and other developers (potentially in house, sub contracted or offshore) to deliver highly usable, high performance software. Project sizes can vary from small mobile apps developed by one individual to larger enterprise systems built in a team development environment.

Candidates with experience in a commercial software / technology business preferred.

About Proteo

We use mobile technology, vehicle telematics and custom business solutions to connect our clients' workforces to information and business processes, bringing control to commotion and helping them to work smarter.

We have developed interchangeable technologies that provide limitless potential in the form of smarter working solutions for the management of movement. This adds value to company operations by increasing mobility and flexibility whilst empowering people with technology that makes things easier.

We provide on-going superior support to our clients' and our quality professional and managed services are tailored to the individual needs of each customer. We solve clients' business problems as much as we design and deliver the technology solution.
